2.3. SCOPE OF THE CUSTOMER REQUEST, AND RESTRICTIONS, IF ANY, AND SCOPE OF THE WORK

This report is prepared at the request of Akmerkez Gayrimenkul Yatırım Ortaklığı A.Ş. for determination of the market value in Turkish Liras of 473 individual units within the scope of the International Valuation Standards 2017 in accordance with Decision of Capital Market Board Decision-Making Body No 25/856 of 22.06.2017 pursuant to the provisions of "Communique on Property Valuation Companies Operating in Capital Market", Series No III-62.3, of Capital Market Board, "the Minimum Requirements for the Contents of Valuation Reports", annexed to said Communique, and the "Communique on the Valuation Standards in Capital Market", Series No III-62.1 of 01.02.2017. This report is prepared within the scope of paragraph 2 of Article 1 of Communique, No III-62.3, of Capital Market Board.

This valuation report may not be used for the purposes other than its intended purpose. No restrictions required by client in valuation of the property.

SECTION 3 DEFINITION OF VALUE, VALIDITY CONDITIONS AND CONFORMITY STATEMENT

3.1. VALUE DEFINITION AND VALIDITY CONDITIONS

Market Value : An estimated price found suitable as of the valuation date for use in exchange of an asset or liability between a willing seller and willing buyer acting in an informed and prudent manner, free of any pressure, and using proper marketing practices through a non-collusive transaction.

In this valuation study, the validity of following issues is assumed:

- With respect to the type of the property, it is assumed that there is an existing market.
- Buyer and seller act in a reasonable and logical manner.
- Parties have full knowledge about the property and act in a manner that will provide the maximum benefit to themselves.
- A reasonable period is allowed for the sale of the property.
- Payment made in cash or done with similar instruments in advance.
- The funding which may be required during the property buying and selling transaction is transacted over the market interest rates.
- The most likely value under the reasonable conditions is appraised for the property.
- Valuation value is found as of, and valid for, the valuation date.

3.2. CONFORMITY DECLARATION

We hereby confirm, to the best of our knowledge and belief, that:

- The findings provided in this report are true to the best of our knowledge.
- Analyses and conclusions provided in this report are restricted only to the specified assumptions and conditions and reflect personal, objective and unbiased professional analyses, opinions and results.
- We do not have any current or future interests in regards to property of this valuation report. We do not have any personal interest or bias against parties to this report.
- The service provided, and fee received in return, by us are not preconditioned to the development and notification of results that will result in favor of the purpose of the client or such pre-defined results, or to the occurrence of a subsequent event that is directly related to the planned use of this valuation.
- Appraisal Expert conducted the valuation in accordance with ethical guidelines and performance standards.
- People engaged in the preparation of this report have the requisite professional educational background.
- Subject property is personally surveyed and reviewed on site. People engaged in the valuation study have prior experience on the location and type of the property being appraised.
- Except for persons stated in the report, no other persons has provided professional assistance in preparation of this report.
- Our report is prepared in strict compliance with the principles and rules of accountability, independence, acceptance and transfer of the work, professional care and diligence, non-disclosure obligations as required by relevant communique of the Capital Market Board. In our company, regular audits are conducted to verify if these principles and rules are constantly observed in accordance with "Quality Assurance System".

4.1.2. EXAMINATION OF TITLE DEED REGISTRY

According to the "Title Deed Records" documents obtained from the Webtapu Portal System between 23.11.2021 and 08.12.2021, the following annotations are found out with respect to the subject properties.

On all individual units, collectively:

Declarations section:

- Management Plan: Dated 03.03.1994.

Annotations section:

- Lease in favor of Turkish Electricity Administration. (journal number 5538 dated 31.12.1992)

Note: Some properties have extension areas for storage according to the title deed record documents provided as an attachment to this report.

4.1.3. CADASTRAL EXAMINATION

The cadastral borders, area and location of the subject property is identified through map sections at Beşiktaş Cadastral Office and via online parcel query system at <https://parselsorgu.tkgm.gov.tr>.

4.1.4. ZONING INFORMATION ABOUT PROPERTY

REPUBLIC OF TURKEY The following details are provided on the zoning status letter issued by Zoning and Urbanization Directorate of Beşiktaş Metropolitan Municipality (No E-24864664-115-7591/13051 - date 20.10.2021);

- Parcel 1, Lot 83, Section 76, Kültür Neighborhood, Beşiktaş Town is classified as "**Tourism Facility (Hotel + Motel + SM)**" area according to the Amended Master Land Use Plan, Scale 1/1500, approved on 22.07.2011, and Implementary Land Use Plan, Scale 1/1000, approved on 07.02.2013.
 - In addition to the building façade contour, specified in the Architectural Project, Approval Date: 16.02.1994, and provided not to expand the area of occupation, and only for purposes of aesthetics and urban design, it is permissible to apply curtain walls in various formats but not to protrude beyond 1.20 meter from building side, and +13,40 above the top elevation, make alterations inside the building, and build transparent skylights but not to protrude beyond + 5.00 meter above maximum permissible building height, except for rising blocks, with the preliminary project to be approved by Town Municipality.
 - It is prohibited to enlarge the occupiable building area as indicated in the building occupation permit No 288 of 24.04.1999 of the building via alterations in the building and curtain wall applications.
 - In any application, the affirmative opinion shall be obtained from Regional Committee of Natural Heritage.
- As above information is in the nature of written information about zoning status, therefore, it does not include all information about plans, and no application can be made on this basis.

All information included in the plan notes are as follows:

- Plan approval border is delimited to 1 parcel, Lot 83, Section 76, Beşiktaş Town.
- The function of the area remaining in the plan approval border is OM (Tourism Facility Area) area. Hotel, motel and Shopping Mall can be built on OM area.
- As indicated in the Architectural Project, Approval Date: 16.02.1994, it is permissible to make building façade applications, and alterations in the building, and transparent skylight applications but not to protrude beyond 5.00 above the maximum permissible building height, except for rising blocks, provided that the preliminary project is amended, which will be approved by town municipality, for this purpose.
- It is prohibited to enlarge the occupiable building area as indicated in the building occupation permit No 228 of 24.04.1999 of the building via alterations in the building and curtain wall applications.

- The conditions of applicable zoning plan and the regulations shall apply to the matters not explicitly regulated here.
- In any application, the affirmative opinion shall be obtained from Regional Committee of Conservation of Natural Heritage.

Also, information about plans with upper scales are provided in the zoning status letter (No 91442078-10.01.02/2019/BN:7697, date: 30.07.2019) issued by City Planning Department of Zoning and Urbanization Directorate of Istanbul Metropolitan Municipality, which is provided as an attachment to this report.

4.1.5. INFORMATION ABOUT PROJECT, LICENSE, DIAGRAM ETC. DOCUMENTS OF PROPERTY

As a result of the investigation of archive files belonging to the parcel, on which subject properties are located, at the Archive of Zoning and Urbanization Directorate of Beşiktaş Municipality, the following information is accessed:

- **Architectural Projects:**
 - Architectural project No 10225, issued on 23.12.1987
 - Architectural project No 7008, issued on 19.10.1989
 - Architectural project No 7847, issued on 27.12.1990
 - Architectural project No 1672, issued on 11.04.1991
 - Architectural project No 691, issued on 16.02.1994 (construction servitude project)
 - Architectural project No 95/4304, issued on 08.09.1995
 - Alteration project, issued on 04.12.2003, an attachment to license No 2013/6122, issued on 06.12.2013
 - Architectural project No 2015/130, approval date: 24.02.2015
- **Building Licenses:**
 - Building License No B3-28, issued on 25.01.1988, for a total area of 181,229 m², consisting of 49,504 m² for shop-store, 72,800 m² for business places, and 58,925 m² for hotel
 - Property has following additional building licenses according to the official documents found in the file of the property.
 - Building license, issued on 23.10.1989
 - Building license, issued on 17.01.1991
 - Building license, issued on 19.06.1991
 - Building license, issued on 17.02.1994
 - Building license, issued on 13.09.1995
 - Building alteration license No 2013/6122, issued on 06.12.2013 for 42,205 m² (business areas)
 - Building alteration license No 2015/130 issued on 03.06.2015 for a total area of 42,205 m², consisting of 35,149.68 m² for office and business areas and 7,055.32 m² for common area
- **Building Occupation Permit Certificates:**
 - Building Occupation Permit Certificate No 1153 issued on 16.03.1994, which certifies that 5 basement floors, ground floor and 2 low-ceiling shop floors are constructed and ready for occupation, and includes 474 individual units.
 - Building Occupation Permit Certificate No 95/5102, issued on 24.10.1995, which certifies that alterations in the shop located in 2nd low-ceiling shop floor to convert it into movie theater completed and ready to use.
(Contains the sentence "2nd low-ceiling shop floor contains 94 shops and 3 movie theaters.)
 - Building Occupation Permit Certificate No 228, issued on 03.03.1999, which certifies the completion of the construction of Apart Hotel G Block which contains 14 units at office block B3, 17 units at office unit E3, and 94 units at block G, and a mini golf venue at elevation of 13.70
 - Building occupation permit certificate No 2016/565 issued on 19.12.2016 for a total area of 42,205 m², consisting of 35,149.68 m² for office and business areas and 7,055.32 m² for common area

Order to Stop Building Reports and Council Decisions

- **Order to Stop Building Report, Item No 24 and Volume No 28, issued on 08.05.2009**
 - In contravention of Scaffolding License No 2009/880-408143-606 issued on 08.05.2009;
 - Pursuant to the letter No 4531, and the report annexed thereof, issued by Land Development Directorate of Metropolitan Municipality on 07.05.2009 as a result of the on-site inspections, which states that, in contravention of the Scaffolding License No 2009/880-408143-606 issued on 11.02.2009, the following items are observed to have been built along with the railing, flooring and siding at the shopping floors of the building which is in a usable condition;
 - The existing gallery spaces are covered partially,
 - An additional escalator leading up to top floor to shopping floors is built,
 - Terrace belonging to shopping block is partially covered with window walls by installing steel profiles.
 - Steel profiles belonging to glass curtain wall are installed on the external façade of the shopping block,
 - A roof structure is built using steel beams under the existing roofing of shopping block which interconnects 3 blocks,
 - Ad Billboards are installed on the external façade, therefore, the construction activities are suspended, and the terrace section of the shopping building is sealed off as a representative of all activities done in contravention of the scaffolding license.
- **Municipality Council Decision No K1-84-113-428351-151, issued on 26.05.2009**
 - Decided on demolition of constructions, as described in the Order to Stop Building, Item No 24, Volume No 28 issued on 08.05.2009, and make them aligned with project pursuant to Article 13 of Bosphorus Act No 2960.
- **Order to Stop Building Report, Item No 25 and Volume No 29, issued on 19.10.2009**
 - This order to stop building is issued and signed to form the basis of further legal proceedings for the alterations and additions, made in the shopping block of Akmerkez as indicated in the inspection report No 2009/5909 issued as a result of the on-site inspections carried out pursuant to the letter No M.34.0.İBB.0.13.24/2009/2088670 (TN) ibb:135111, issued by Land Development Directorate of Metropolitan Municipality on 06.10.2009.
- **Municipality Council Decision No K1-207-274-458821-317, issued on 17.11.2009**
 - Decided on making the constructions indicated in the order to stop construction report, Item No 25, Volume No 29, issued on 19.10.2009 aligned with the project and issue a license for other matters indicated in the report.
- **Demolishment Reports of Beşiktaş Municipality**
 - With respect to the aforementioned municipality council decision issued on 17.11.2009, there are demolition reports issued on 18.11.2009, 19.11.2009, 20.11.2009, 23.11.2009 and 24.11.2009, provided as an attachment to this report.
- **Order to Stop Building Report, Item No 35 and Volume No 0007, issued on 17.09.2015**
 - This Order to Stop Building Report is issued for observation that the common area, on the side of Nispetiye Street and Adnan Saygun Street, of Akmerkez AVM, shown as dismountable material in the approved architectural project, are made for private use by enclosing it with side partitions on the ground terraces and by closing the corridor passages. The total area used such in contravention of the project is 316.25 m².

- **Municipality Council Decision, Decision No 050.02.04-277, Record No 444, Release No 948039-484 issued on 03.11.2015**
 - Decided on demolition of constructions, as described in the Order to Stop Building, Item No 35, Volume No 0007 issued on 17.09.2015, and make them aligned with project pursuant to Article 13 of Bosphorus Act No 2960.
- **Municipality Council Decision, Decision No 050.02.04-278, Record No 445, Release No 948044-485 issued on 03.11.2015**
 - Decided on imposing a total fine of TRY 9,383.77 on Akmerkez GYO A.Ş. for the constructions indicated in the order to stop building report, Item No 0007, Volume No 35, issued on 17.09.2015, pursuant to Article 42 of Zoning Act No 3194.
- **Order to Stop Building Report, Item No 37 and Volume No 0049, issued on 05.07.2017**
 - This Order to Stop Building Report is issued for observation that the ground terraces, on the side of Nispetiye Street, of Akmerkez AVM, shown as dismountable material in the approved architectural project, are made for private use by enclosing it with side partitions on the ground terraces and by closing the corridor passages. The total area used such in contravention of the project is 419.21 m².
- **Municipality Council Decision No 2017/233, issued on 10.08.2017**
 - Decided on demolition of constructions, as described in the Order to Stop Building, Item No 37, Volume No 0049 issued on 05.07.2017, and make them aligned with project pursuant to Article 13 of Bosphorus Act No 2960.
- **Court Decisions Relating to Lawsuit Filed Against Order to Stop Building Reports and Municipality Council Decisions**
 - **2 court decisions are found out, which are issued during 2009 after Order to Stop Building Report, Item No 24 and Volume No 28, issued on 08.05.2009, and Municipality Council Decision No K1-84-113-428351-151, issued on 26.05.2009, and lawsuit names are provided below. (For details See Annexes: Court Decisions)**
 - Decision of Istanbul 6th Administrative Court, Docket No: 2009/1326, issued on 11.08.2009
 - Decision of Istanbul 6th Administrative Court, Docket No: 2009/1326, issued on 09.10.2009
 - **Many court decisions are found out, which were issued after Order to Stop Building Report, Item No 37 and Volume No 0049, issued on 05.07.2017, and Municipality Council Decision No 2017/233, issued on 10.08.2017, and lawsuit names are provided below. However, building registry documents were issued for disputed individual units while said lawsuits were pending. (For details, See Annexes: Court Decisions)**
 - Decision of Istanbul 2nd Administrative Court, Docket No: 2018/35, issued on 11.01.2018
 - Decision of Istanbul 1st Administrative Court, Docket No: 2018/41, issued on 11.01.2018
 - Decision of Istanbul 9th Administrative Court, Docket No: 2018/40, issued on 12.01.2018
 - Decision of Istanbul 10th Administrative Court, Docket No: 2018/58, issued on 12.01.2018

Sub-paragraph 3 of Article 6 "Usage Areas of Building Registry Document" of Regulation on Principles and Procedures for Issuance of Building Registry Document, promulgated in Official Journal No 30443 of 06.06.2018, provides for "**With respect to the buildings issued with Building Registry Document, the demolition decisions given pursuant to Act No 3194 and the uncollectible administrative fines shall be cancelled.**" Therefore, all order to stop building reports and municipality council decisions issued with respect to the properties before coming into force of the building registry documents have become moot and invalid.

There is no order to stop building reports and municipality council decisions issued before the coming into force of the building registry documents for the subject properties and the real estate they are located pursuant to Articles 32 and 42 of Zoning Act No 3194.

4.2. INFORMATION AS TO WHETHER ENCUMBRANCES ANY RESTRICTION OF TRANSFER EXIST WITH RESPECT TO THE PROPERTY

Management plan, lease annotation and outbuildings as indicated in the title deed records are not of restrictive nature and have no adverse impact on transfer and value of the property under the provisions of (c) and (j) of 22(1) of Communique on Principles of Real Estate Investment Partnerships.

Actual use of the properties conform to the function of properties as indicated in the title deed records. As a result of our examination on the title deed records, we have the opinion and conclude that there is no risk against inclusion of the properties in the "buildings" title of a portfolio of Real Estate Investment Partnership under the provisions of capital market legislation.

4.3. INFORMATION ABOUT, IF ANY, THE ACQUISITION AND SALES TRANSACTIONS AND THE CHANGES IN LEGAL STATUS (CHANGES IN ZONING PLAN, EXPROPRIATION PROCEDURES ETC.) OF PROPERTIES IN THE RECENT THREE YEARS

4.3.1. CHANGES IN CADASTRAL STATUS

As a result of the examinations, no change is found out in the cadastral status of the parcel on which the subject properties are located in the last 3 years.

4.3.2. CHANGES IN OWNERSHIP

As a result of the examinations, no change is found out in the ownership of the parcel on which the subject properties are located in the last 3 years.

4.3.3. CHANGES IN ZONING STATUS

As a result of the examinations, no change is found out in the zoning status of the parcel on which the subject properties are located in the last 3 years.

4.3.4. CHANGES IN LEGAL STATUS

The archive file belonging to the parcel, on which subject properties located, retained at the archive of Zoning and Urbanization Directorate of Beşiktaş Municipality contains Order to Stop Building Report, Item No 24 and Volume No 28, issued on 08.05.2009; Municipality Council Decision No K1-84-113-428351-151, issued on 26.05.2009; Lawsuits filed against and many court decisions given with respect to the Order To Stop Building Report, Item No 37, Volume No 0049; and Municipality Council Decision No 2017/233 issued on 10.08.2017; and description about court decisions are provided in the "4.1.5 Information About Project, License, Diagram Etc. Documents Of Property" section of this report. Lawsuits are currently pending and examples of the court decisions are provided as an attachment to this report. However, building registry documents were issued for disputed individual units while said lawsuits were pending.

4.4. INFORMATION ABOUT ZONING STATUS OF THE REGION IN WHICH PROPERTY IS LOCATED

Property is situated within the "**Tourism Facility (Hotel + Motel + SM) Area**". In the region, along the same axis of the property, there, in general, are parcels on which buildings with residential and business function are located.

4.5. DISCLOSURES ABOUT ORDERS TO STOP BUILDING, DEMOLISHMENT DECISIONS, BUILDING AT RISK REPORT ETC. WITH RESPECT TO THE PROPERTY

There are orders to stop building, and council decisions, details of which are provided in the "4.1.5. Information About Project, License, Diagram Etc. Documents Of Property" section of this report. However, building registry documents are later obtained with respect to said decisions, and there is no adverse document (order to stop building decisions, demolition decisions and building at risk report) issued after the coming into force of building registry documents.

4.6. INFORMATION ABOUT AGREEMENTS MADE WITH RESPECT TO THE PROPERTY (PRELIMINARY SALES AGREEMENTS, FLAT-FOR-LAND AGREEMENTS AND REVENUE SHARING AGREEMENTS, ETC.)

No preliminary sales agreement, flat-for-land agreements and revenue sharing agreement made with respect to subject properties has been submitted to us.

4.7. INFORMATION ABOUT BUILDING LICENSES OBTAINED, AMENDMENT LICENSES, BUILDING OCCUPATION LICENSES OBTAINED FOR PROPERTIES AND PROPERTY PROJECTS, AND AS TO WHETHER THE ALL LICENSES AND PERMITS ARE OBTAINED PURSUANT TO APPLICABLE LEGISLATION, AND LEGAL DOCUMENTS ARE AVAILABLE IN FULL AND ACCURATELY

According to Article 22(1)(b) of the Communiqué on Principles of Real Estate Investment Partnerships, "For any kind of buildings and similar structures to be included in their portfolios, it is mandatory that the relevant building occupation permit has previously been obtained and relevant flat ownership has been established. However, in case structures such as hotel, shopping mall, business center, hospital, commercial warehouse, factory, office building and branches, owned solely or jointly, are fully or partly used only for earning lease revenue, it is deemed to be satisfactory to obtain relevant building occupation permit and that the type indicated in the relevant title deed certificate is appropriate to the current status of the property. Also, for satisfaction of the foregoing condition to obtain building occupation license, it is deemed sufficient to have obtained the building registry documents under the Provisional Article 16 of Zoning Act No 3194 of 3/5/1985."

Necessary licenses and permits have been obtained for the buildings located on the parcel pursuant to applicable legislation, and building registry documents have been issued as part of "zoning peace" pursuant to Provisional Article 16 of Zoning Act No 3194. Details about legal documents are provided in the "4.1.5. Information About Project, License, Diagram Etc. Documents Of Property" section of this report.

4.8. INFORMATION ABOUT INSPECTIONS CONDUCTED ON THE PROJECTS RELATING TO THE SUBJECT PROPERTY BY CONSTRUCTION INSPECTION FIRM (TRADE TITLE, ADDRESS ETC.) WHICH CONDUCTED SAID INSPECTION PURSUANT TO CONSTRUCTION INSPECTION CODE NO 4708 OF 29.06.2001

Property being appraised is not at the stage of project. There are, on the parcel, buildings for which building occupation licenses and building registry documents are obtained, and existing buildings are not subject to the building inspection.

4.9. IF VALUATION IS CARRIED OUT PURSUANT TO A CERTAIN PROJECT, DETAILED INFORMATION ABOUT THE PROJECT AND EXPLANATION THAT THE SAID VALUE PERTAINING ONLY TO THE EXISTING PROJECT, AND DIFFERENT VALUES MAY BE CALCULATED IF A DIFFERENT PROJECT IS APPLIED

This valuation report is not prepared for a project valuation work.

4.10. INFORMATION ABOUT ENERGY EFFICIENCY CERTIFICATE OF THE PROPERTY, IF ANY

The buildings which contain the subject properties have energy efficiency certificates, which are provided as an attachment to this report.

SECTION 5 PHYSICAL PROPERTIES OF PROPERTY

5.1. ANALYSIS OF THE REGION IN WHICH PROPERTY IS LOCATED, AND DATA USED

The subject properties include 445 individual units, contained in the Akmerkez Shopping Mall at Door Number 54 and 1 individual unit contained in said Shopping Mall at Door Number 56, located on the Nispetiye Street, and 27 individual units contained within Akmerkez Residence at Door Number 3, located on the Adnan Saygun Street, all located in Kültür Neighborhood, Beşiktaş town, Istanbul city.

Access to Akmerkez Shopping Mall which contain the subject properties is via the Büyükdere Street along which Istanbul's the most important business centers, plazas, shopping malls and residence projects are located. Akmerkez Shopping Mall is situated on the right side of the Nispetiye Street, a continuation of the Aydar Street which remains at right side while travelling along the Büyükdere Street in the direction of Beşiktaş - Maslak.

Akmerkez Shopping Mall is surrounded by the adjacent Etiler Anatolian High School, and Municipality Estate, Levent Vocational and Technical Anatolian High School, Hisarüstü-Levent Subway Nispetiye station, and 7-8 story buildings which ground floors are used as business places, and regular floors as office or residence, and the villas and residential estates used by the families in high-revenue group.

The factors such as being located in the city center in a region with high rent revenue, ease of access, high customer attraction, high commercial potential of the vicinity and completed infrastructure positively affects the value of the properties.

Region is located within territory of Beşiktaş Municipality and has a completed infrastructure.

5.2. PHYSICAL, STRUCTURAL, TECHNICAL AND CONSTRUCTION PROPERTIES OF THE PROPERTY

5.2.1. TECHNICAL AND STRUCTURAL PROPERTIES OF THE BUILDING

CONSTRUCTION TYPE	Reinforced Concrete Framing
CONSTRUCTION ORDER	Discrete (Block)
AGE OF THE BUILDING	~ 28
NUMBER OF FLOORS	According to the approved architectural project and existing situation: Shopping Mall: 8 floors (5 Basements + Ground Floor + 2 Regular Floors) Residence: 23 floors Office: Block B3: 14 floors Office: Block E3: 17 floors
TOTAL CONSTRUCTION AREA OF BUILDING	181,229 m ² (according to building license dated 25.01.1988)
ELECTRICITY	City grid
GENERATOR	CAT brand - 3 units with 1,100 KVA capacity Cummins brand - 2 units with 1,000 KVA capacity, 2 units with 530 KVA capacity, 1 unit with 1,400 KVA capacity, AKSA brand - 1 unit with 400 KVA capacity
LIGHTNING ROD	Available (Faraday Cage)
HEATING/COOLING SYSTEM	Chiller group YORK, TRANE and DAIKIN branded 3 units centrifugal, 2 units water-cooling screw, 6 units air cooling, 2 units 4900 kw, 2 units 2092 kw, 2 units 2558 kw, 2 units 1433 kw, 1 units 870 kw capacity hot water boiler, and 2 units 2000 kw, 2 units 1400 kw, 3 units 490 kw, 3 units 540 kw and 1 units 300 kw capacity cooling group
AIR CONDITIONING PLANTS	A total of 43 units consisting of 33 units Flat, 9 units Alarko, 1 unit Ventas branded air conditioners
ELEVATOR / ESCALATOR	31 units Buga Otis Elevator / 35 units Escalator
WATER-SEWERAGE SYSTEM	City grid
HOT WATER BOILER	7 units Selnikel brand, 2 units Buderus brand
WATER STORAGE	Available (A total capacity of 1,200 ton)
WATER BOOSTER	25 units Wilo branded water booster
SECURITY	CCTV System (463 cameras and 30 DVR), Non-CCTV places (40 cameras and 3 DVR), card access system, 8 X-Ray devices, 8 door-type metal detectors, and 26 magnetic doors. Also, as part of the "Integrated Security Solutions System", 15 monitoring camera, 5 PTS monitoring camera, and connected intercom system and 4 automatic barriers connected to the system.
FIRE INSTALLATION	Entire building has water sprinkler system and hydrants). Electric rooms have FM 200 gas suppressors.
FIRE SYSTEM	Fire boards, smoke and heat detectors, fire phones and denunciation units
AUTOMATION SYSTEM	Honeywell Automation System (22 units automation board connected to the 23 units IPC communication line, and 116 controllers connected to them)
GARAGE	There is a garage available.

5.2.2. GENERAL PROPERTIES OF BUILDING

- Akmerkez complex is designed by Architect Fatih URAN - Di Design Group Development, and constructed by Yüksel İnşaat A.Ş. Construction of shopping mall and other blocks were completed in 1993 - 1994.
- Complex is constructed as reinforced concrete framing. Curtain walls are used on higher blocks.
- Akmerkez complex has been serving as multi-purpose shopping mall, office and residence since 18 December 1993.
- Sitting on a triangle area formed by two 14- and 17-floor office towers, one 23-floor residential building, and one 4-floor shopping mall, Akmerkez has a central and prestigious location with faces to the Nispetiye Street and Ulus Road in Etiler region.
- There are 14 offices in B Block among 2 office towers, called as Block B and E, all of which is owned by third parties. In Block E, all individual units except for Floor No 1 used as office, are owned by third parties.
- The block called as Block G and used for residential purposes has 23 floors, and only 27 of the residential individual units are owned by Akmerkez GYO A.Ş.
- Operations of Akmerkez is managed by Üçgen Bakım ve Yönetim Hizmetleri A.Ş. which is a tenant of Akmerkez Gayrimenkul Yatırım Ortaklığı A.Ş. and using a section of 1st Floor of Block E offices.
- Garages have commercial storages as an outbuilding to the individual units.
- Shopping Mall has 2 entrance gates at Ahmet Adnan Saygun Street, and 2 entrance gates at Nispetiye Street. The main entrances to the office blocks are located at the ground floor of the shopping mall. Main entrance of the residential block is located at Ahmet Adnan Saygun Street. Office and residential blocks are also accessible with security passes from the garages and shopping mall floors.
- As the shopping mall contained in the property is the first of its kind in our country, it became the one of the first projects which needed renovation. Therefore, it underwent renovation during 2013 - 2015.
- Access to the subject property is easy via public transportation, and located at walk distance to the M6 Levent-Hisarüstü Subway Station.

5.2.3. SM BLOCK:

- The block which contains shops are 4-floors excluding garage. SM has a total lettable area of 33,077 m² under the ownership of Akmerkez GYO. There is a total of 445 individual units which ownership belongs to Akmerkez GYO A.Ş.
- There is a total storage area of 2,207.59 m² as of valuation date, which are located outside the commercial areas of SM, in the form of outbuilding (or not), mostly at basement floors. In Akmerkez, there is a shopping area of 1,227 m², sold to other parties, not owned by Akmerkez GYO A.Ş. During alteration, some shops are used by combining them fully or in part.
- Garage area is located across 4 basement floors under the Shopping Mall. According to the title deed records, 2nd and 3rd basement floors used as garage area are owned by Akmerkez Gayrimenkul Yatırım Ortaklığı A.Ş.
- Some individuals units are used in combination in order to provide shops larger areas of use in line with the current retailing trends.

- Listed below is the distribution of shopping mall area by categories of the existing tenant shops in Shopping Mall.

SHOP TYPE	LETTABLE 2021 AREA (m ²)	YEAR 2021 DISTRIBUTION (%)
ACCESSORIES	147	0.44%
SHOES&BAG	826	2.50%
ANCHORS	11,487	34.73%
ENTERTAINMENT	1,128	3.41%
ELECTRONICS&WHITE GOODS	1,272	3.85%
HOME&DECORATION	2,258	6.83%
CLOTHING	6,551	19.81%
SERVICE	856	2.59%
BOOK&STATIONERY&TOY	1,361	4.11%
OPTICS	192	0.58%
WATCH&JEWELLERY	184	0.56%
HEALTH&COSMETICS	1,254	3.79%
SPORT	1,108	3.35%
FOOD&BEVERAGE	2,990	9.04%
OTHER	120	0.36%
VACANT	1,343	4.05%
TOTAL	33,077	100%

- Grounds are coated with ceramic in circulation areas, and concrete in garage areas. Walls are painted with satin in circulation areas, and plastic in garage areas.
- Grounds are coated with ceramic in circulation areas, and concrete in garage areas.
- Exterior façade is aluminum joinery and glass.
- Lighting is spotlight in circulation areas, fluorescent in garage areas.
- At Akmerkez SM, rent includes general expenses, and no separate general expenses are charged to tenants.
- Also, in terms of the average lease areas, the leased volumes observed to have sizes below the average of the counterparts. In this respect, it is possible to say the number of tenants at Akmerkez SM is more than the number of shops at SMs of same size.

5.2.4. OFFICE BLOCKS

- Office Blocks B3 and E3 rise as round shaped towers above the shopping mall.
- Block B3 contains a total of 14 individual units in the nature of office, and Block E contains a total of 17 individual units in the nature of office.
- 1 office owned by Akmerkez GYO A.Ş. is located in Block E3 at 1st floor, and has a usable area of 900 m² according to title deed project. This area is jointly used by Akmerkez GYO A.Ş. and management company Üçgen Bakım ve Yönetim Hizmetleri A.Ş.

5.2.5. RESIDENCE (HOTEL-A) BLOCK

- Residence (Hotel-A) block rises as a triangle shaped tower above SM.
- Block contains a total of 95 individual units, consisting of 1 individual unit as multipurpose hall, cafe, and 94 individual units as apartments.
- Among these units, 27 individual units as apartment are owned by Akmerkez GYO A.Ş.

5.2.6. GENERAL FEATURES OF INDIVIDUAL UNITS

- The individual units in the Shopping Block are delivered to the tenants without fine constructions works (but with cement-finished floors, and grouted walls and ceilings), and each tenant can build decoration and alterations suitable to its own business activity provided that it follows the architecture of the facility with the permission of SM Management. Any kind of removable decoration material is procured by tenant.
- These structures in the indoor spaces are installed using simple construction methods, and, when necessary, these can be removed or restored to initial condition without damaging the static of the building. These structures are installed for only purposes of tenant, and can easily be restored to the initial conditions at the end of lease period, or when necessary.
- Subject property Residence (Hotel A) Block contains 27 individual units. 6 of these individual units have been combined by twos to form 3 apartments. Provided following is the individual unit numbers, floors, apartment types, and gross areas for sales of these 24 apartments:

IND. UNIT NO	FLOOR NAME	APARTMENT TYPE	SALES-BASIS GROSS AREA (M ²)
475	1	A1 Flat	210
476	1	B1 Flat	96
477	1	C Flat	238
478	1	B2 Flat	96
479	1	A2 Flat	210
480	2	A1 Flat	210
481	2	B1 Flat	96
482	2	C Flat	238
483	2	B2 Flat	96
484	2	A2 Flat	210
485	3	A1 Flat	210
487	3	C Flat	238
489	3	A2 Flat	210
490	4	A1 Flat	210
492	4	C Flat	238
494	4	A2 Flat	210
495	5	A1 Flat	210
499	5	A2 Flat	210
504	6	A2 Flat	210
509	7	A2 Flat	210
513-514	8	D2 Flat	306
518-519	9	D2 Flat	306
523-524	10	D2 Flat	306
537	13	D2 Flat	306
TOTAL			5080

- Currently, types A2 and B2 located on Floors 8, 9 and 10 are combined to form Type D2 Apartment:
- Subject office, individual unit number 583, is located in Block E3 at 1st floor, and has a usable area of 900 m² according to title deed project. Property consists of a reception area, 4 meeting rooms, 5 manager rooms, personnel offices, open office areas, archive, storage, mechanic room, toilets and kitchen sections. Flooring is laminate parquet in some sections and ceramic in other sections, walls are satin paint, and ceilings are plastic painted suspended type.

5.3. ADVERSE OR RESTRICTIVE FACTORS ON VALUATION

For the subject properties, 15 "**Building Registry Documents**" are issued in accordance with Provisional Article 16 of Act No 3194. Pursuant to Act No 3194, Building Registry Document is valid until reconstruction of the building, or application of the urban transformation. In case of renewal of the buildings issued with Building Registry Document, provisions of applicable zoning legislation shall apply. The earthquake resistance and conformity of the building to scientific and craft norms and standards are under responsibility of the landlord.

5.4. INFORMATION ABOUT, IF ANY, ESTABLISHED INCONSISTENCIES WITH LICENSE IN RESPECT OF THE EXISTING BUILDING, OR PROJECT UNDER CONSTRUCTION

As a result of the examinations conducted on the archive file pertaining to the parcel on which subject properties are located at the zoning archive of Zoning Directorate of Beşiktaş Municipality, there are many orders to stop building reports and municipality decisions issued for the properties. However, building registry documents are later issued for areas claimed to be inconsistent, legalizing said inconsistencies. Detailed information about said reports and decisions, and the building registry documents issued later are provided in the "4.1.5 Information About Project, License, Diagram Etc. Documents Of Property" section of this report.

5.5. INFORMATION AS TO WHETHER ALTERATIONS IN LICENSED BUILDINGS REQUIRE RE-LICENSING UNDER ARTICLE 21 OF ZONING ACT NO 3194.

Necessary licenses and permits have been obtained for the buildings located on the parcel pursuant to applicable legislation, and building registry documents have been issued as part of "zoning peace" pursuant to Provisional Article 16 of Zoning Act No 3194.

5.6. INFORMATION ABOUT ACTUAL USE OF THE PROPERTY, AND, IF LAND OR PLOT, IF THERE IS ANY BUILDING ON IT AND, IF EXISTS, ACTUAL USE OF THESE BUILDINGS

As of the valuation date, all buildings existing on the subject property have their building occupancy licenses and building registry documents, and actual use of them are consistent with their pre-defined functions.

SECTION 6 ANALYSIS OF MARKET DATA

6.1. ECONOMIC OUTLOOK

While COVID-19 pandemic follow a fluctuating courses with delta variant cases in the 2021 Q3, countries seem diverged depending on the rate of vaccination, and tightness of the restrictions. The pandemic-instigated divergence among countries were also reflected on the economic performance while disruptions in the supply chain fuel the downward risks in the short run. Therefore, a periodical and mild slowdown is seen in the world economy. In the medium term, thanks to sustained vaccination, retarding effects of pandemic on the economy activity is expected to remain limited, however, pandemic management still remains important in terms of global outlook.

While vaccination continued in Turkey, numbers of COVID-19 case was at the high levels. Growth data in second quarters pointed out a strong performance thanks to slowdown in local demand remaining limited, and foreign demand sustaining its strength. In 2021 Q3, seasonally and calendar adjusted Gross Domestic Product (GDP) has grown by 0.9% compared to the previous period, while calendar adjusted GDP has grown by 21.9% year-by-year, and by 21.7% not-calendar adjusted. Total GDP for four quarters on the basis of USD has grown from 729.2 billion USD in first quarter to 765.1 billion USD. On the part of expenditures, the highest contribution to the growth came from private industry consumption, entire annual growth was recorded in all sectors, other than finance.

Precursor data relating to 2021 Q3 signals that slowdown in the economy is limited. Industrial production grew by 1.3% in August, after shrinkage in 3.4% in July. In the same period, retail sales declined by 1.2% and 0.3%, respectively. On the other hand, turnover indices shrunk by 1.5% in July, while rising by 4.0% in August. In line with these trends, a mixed course emerged in the labor market. According to the season-adjusted data, the general

employment rate, which was 10.7% at the end of second quarter of 2021, went up to 12.1%, where it then remained flat. Broad-defined unemployment indicators retreat again, after a rise in the July. In addition, manufacturing industry purchasing managers index (PMI), capacity utilization rate, confidence indices and banking industry loan volume September and October, 1st half, results confirmed that weakening in the local demand remained limited, and foreign demand continues to support economic activity.

Inflation continued to rise, driven by accumulated costs and high increases in food prices triggered by the global commodity prices in 2021 Q3. General Consumer Price Index (CPI) annual inflation increased up to 19.6% in September gradually from 17.5% in June, 2021. In the same period, core inflation indicators were observed to have a mixed trend. Annual core inflation (Index C) declined from 17.5% in June, to 17.2% and 16.8% in July and August, respectively, and then increased to 17.0% in September. General Domestic Producer Index (DPI) annual inflation, which was 42.9% in June 2021, increased to 44.9% in July and 45.5% in August, and then decreased to 44.0% as of October. Public price adjustments, accumulated costs, fluctuations in exchange rates, and expectations, coupled with trends in global energy prices, keep alive the upward risks on the inflation outlook.

Due to the upward risks on the inflation outlook, Turkish Central Bank keep policy interest rates fixed at 19.0% in July and August, and reduced it by 100 base points in September. Also, Turkish Central Bank stated that rises in food and energy prices, disruptions in the supply processes, rises in the managed/guided prices, and post-pandemic demand developments have effects on the rising inflation rates. Evaluating that rising inflation rates caused by factors external to the area of influence of monetary policy, Turkish Central Bank pointed out the retarding effects of monetary position on the loans and local demand. In addition, Turkish Central Bank reduced the weekly repo interest rate by 200 base points in October meeting from 18.00% to 16.00% beyond expectations. Noting that thanks to the reinforcement as part of macro discretionary policy, consumer loans developed moderately, Turkish Central Bank highlighted that a limited area remained in the remaining of the year for downward revision in policy interest rate due to supply side temporary elements.

6.1.1. GDP GROWTH RATE

Turkish Economy grew by 21.7% in the second quarter of 2021, compared to the same period in previous year. In the period of 2003 to 2020, Turkish Economy grew by, on average, 5.2% annually.

Source: REPUBLIC OF TURKEY Ministry of Commerce, Economic Outlook October 2021 - Last Updated On: 08.11.2021

6.1.2. INFLATION

According to Inflation Report published by Turkish Central Bank on 28 October 2021; consumer inflation realized as 19.58 percent in the third quarter of 2021, which is above the upper limit of forecast range provided in July Inflation Report, while inflation B realized within the forecast range with 18.63%. This differentiation is mainly driven by rising trend in the unprocessed food prices. Domestic economic activities exhibited a strong outlook with the effects of both re-opening and foreign demand; while rising import and international food prices as well as supply side factors such as freight costs, agricultural drought, disruptions to supply process negatively affected outlook of the inflation. In this period, while inflation expectations is on the rise, dispersion index pointed out the widely-dispersing outlook in the rising prices. The effect of managed/guided price adjustments (electric, natural gas, network water, raw milk) on the consumer inflation has increased compared to previous quarter. Tax adjustments (not reflecting DPI increases to alcoholic drinks and tobacco, base arrangement for the passenger cars) and "échelle mobile" practice had balancing effects on the inflation. With these developments, quarterly increase in seasonally-adjusted consumer prices realized as 4.65 percent. While foreign price pressures, energy price developments and ongoing supply shortages and freight costs continued to be determinants on producer prices, the effect of the producer prices-related pressures on the consumer prices continued.

Food and energy are the main groups that drive consumer inflation from 17.53 percent in second quarter to 19.58 in third quarters. In this period, the food group contributed 2.03 points to annual inflation, reaching up to 6.99 points, while contribution of energy group has risen by 0.75 points, reaching up to 2.75 points. With the re-opening process in third quarter, the contribution of service inflations reached up to 4.23 points with an increase of 0.38 points. In this period, the contribution of basic commodity group and alcohol-tobacco and gold groups has limiting effects on the consumer inflation.

6.1.6. OUTLOOK OF HOUSE SALES

In the third quarter of 2021, total house sales realized as 396,328 units, an increase by approx. 36.8% compared to previous quarter. However, house sales decreased by 26.1% compared to same period of the previous year where the house loan interest rates were lower in the third quarter of previous year.

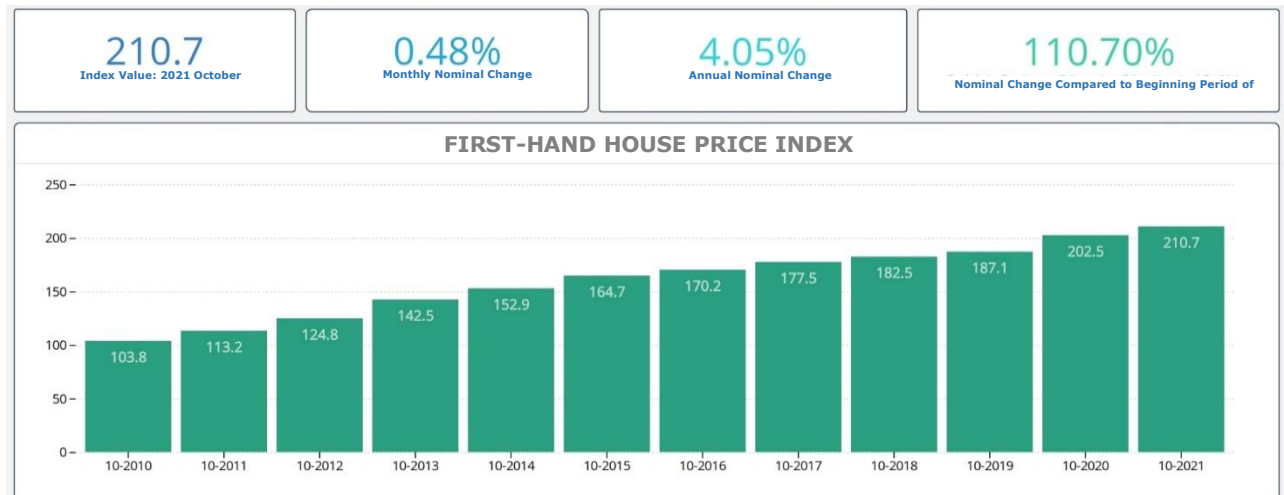

Similar to total sales, the first-hand sales increased by 36.3% compared to previous quarter, decreased by 26.1% compared to same period of previous year, and 119,278 houses were sold as first-hand. And second-hand sales saw an increase of 37.0% compared to previous quarter, and a decrease of 26.1% compared to same period of previous year, and 277,050 houses were exchanged in the third quarter. The rate of first-hand sales to the total sales declined to 30.1% from 30.2% in the second quarter.

Despite the house loan interest rates were at the similar level that of previous quarter, mortgage sales saw an increase of 36.4% compared to previous quarter. Accordingly 77,687 houses were sold under mortgage, while other sales realized as 318,647 units. Mortgage sales decreased by 67.9%, other sales increased by 8.3%, compared to compared to same period of previous year where the house loan interest rates were lower.

Sales to foreigners increased by 60.2% compared to previous quarter, and by 42.7% compared to same period of previous year, driven also by the increased exchange rates. In the third quarter, 16,991 houses were sold to foreigners. It is important to note that 6,630 houses were sold in September, which is the highest monthly sales in the history of the data. In the house sales made to foreigners in the third quarter, Istanbul ranks first with a share of 45.2%, followed by Antalya with 19.2%.

As of August, 2021, the highest increase rates in both house prices as well as first-hand house prices are observed in the history of data. In Turkey, countrywide, house prices increased by 3.88% on the monthly basis, by 33.38% on the yearly basis, with first-hand house prices increased by 5.20% on the monthly basis, and 40.17% on the yearly basis. Real change in house prices realized as 11.85%, and real change in first-hand house prices realized 17.55%, reaching the highest level in the dataset.

According to the results of REIDIN-GYODER First-Hand House Price Index, a nominal increase by 0.48% realized in October compared to previous month, by 4.05% to the same period of previous year, and by 110.70% to the January 2010, the beginning period of the Index.

In October, First-Hand House Price Index has realized a nominal decrease by 0.05% for 1+1 house type, and nominal increase by 0.93% for 2+1 house type, 0.29% for 3+1 house type, 0.52% for 4+1 house type, compared to the previous month.

In an evaluation of the destocking rates in branded houses during October, a destocking rate of 6.82% was observed on the unit basis. Out of branded houses sold in October, 40.93% are completed house stocks, with 59.07% for houses under construction.

It is observed that 6.48% of the sales realized as part of branded housing projects in October were made to foreign investors (the last 6-months average is 7.04%). In October, 1+1 houses were seen to have the highest sales ratio, with 42.86%.

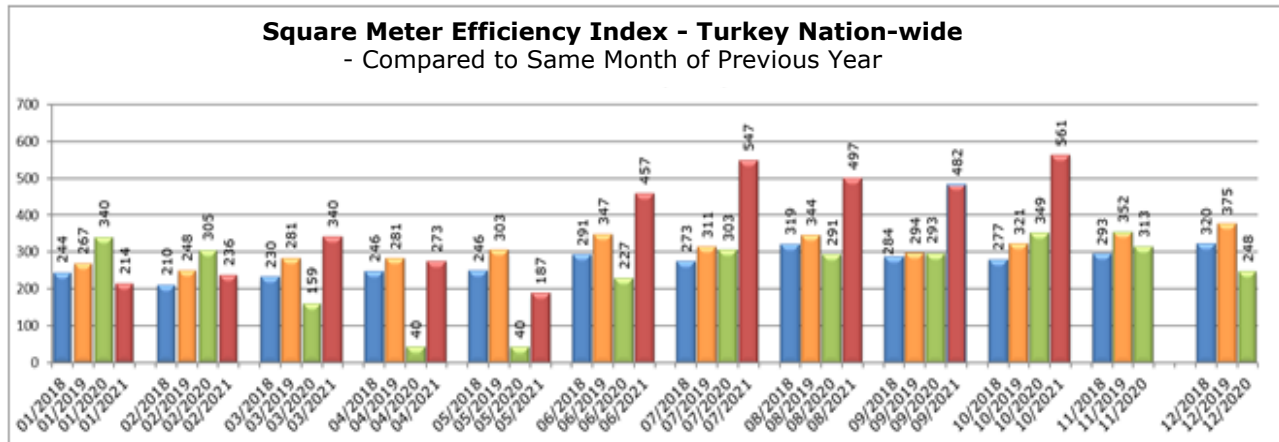

When analyzed the advance payment, notes and bank loans preferences of the customers who purchased houses from branded projects, 51.84% of them preferred advance payment, 18.41% notes, and 29.75% bank loan in October.

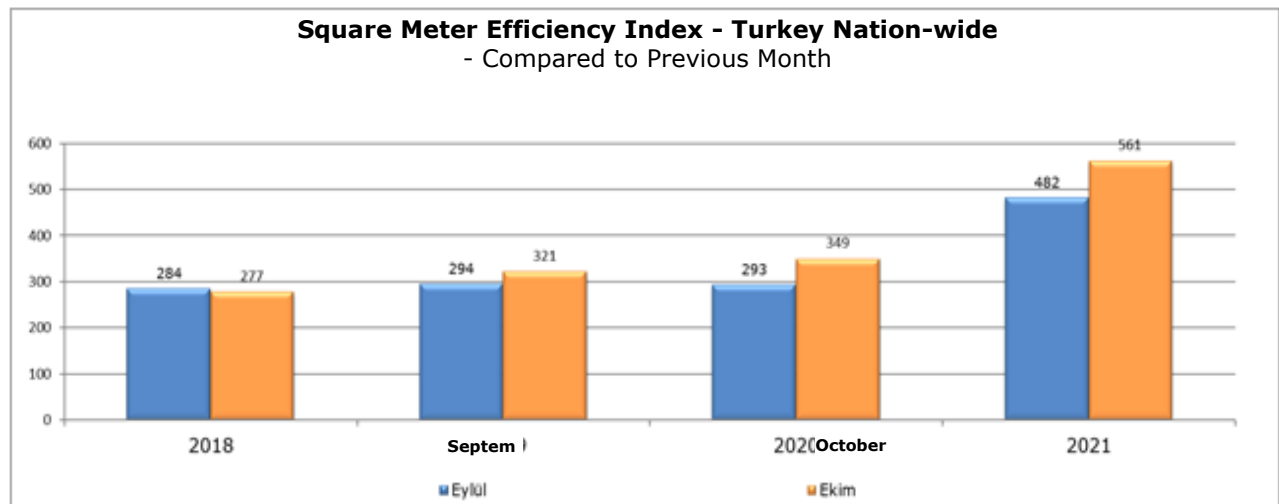

6.1.7. TURKISH RETAILING MARKET AND SHOPPING MALLS

According to the October 2021 results of the SM Retailing Index, created as a joint effort of Association of Shopping Malls and Investors and Akademetre Research Company; turnover index increased in October 2021 by 60.7 points reaching up to 561 points, before inflation adjustment, compared to the same month of previous year. In October 2021, square meter efficiency index increased by 16.4 percent reaching up to 561 points, before inflation adjustment, compared to September 2021.

*Turnover index is calculated by taking weight of GLA sizes of Anatolia and Istanbul.

In October 2021, turnovers per lettable area in SMs realized as TRY 2,774 in Istanbul, TRY 1,715 in Anatolia. Square Meter Efficiency as Turkey nation-wide realized as TRY 2,139 in October 2021.

Compared with October of previous years, square meter efficiency index by categories saw an increase of 76.8 percent in the shoes-bag category, 77.3 percent in ready-wear category, 72.6 percent in food & beverage category, 52.7 percent in other areas in SMs, 48.3 percent in hypermarket category, and 16.7 percent in technology category.

Compared to September 2021 period, October 2021 period witnessed an increase of 26.2 percent in shoes category, 20.3 percent in ready-wear category, 13.1 percent in technology category, 11.8 percent in others category, 11.7 percent in hypermarket category, and 8.9 percent in food & beverage category.

The number of visits index increased by 31.2 percent in the third quarter, compared to same period of previous year.

* (Others category includes stores such as construction market, furniture, home textile, gift items, toys, movie theatre, personal care and cosmetics, jewelry, hobby, pet shop, tailor and shoe repair services, exchange services, dry cleaning and pharmacy.)

In October 2021, the number of visits index increased by 25.0%, reaching up to 80 points, compared to same month of previous year.

Compared to September 2021, the number of visits index saw an increase of 12.7 percent in October 2021 period.

The following table shows the standards created by International Council of Shopping Malls, and accepted and implemented by Association of Shopping Malls and Retailers, and the shopping malls which conform to these standards.

SHOPPING MALLS STANDARDS		
SM Type	Size	Lettable Area (m ²)
TRADITIONAL	Very Large	80,000 and above
	Large	40,000-79,999
	Satisfactory	20,000-39,999
	Small	5,000-19,999
SPECIALTY	Large Retailing Park	20,000 and above

6.1.8. ISTANBUL OFFICE MARKET

Istanbul Office Market was mainly under effects of summer season and pandemic in 2021 Q3.

During pandemic period, fully-furnished office rental companies which offer flexible rental options are observed to attract increasing demands. This period is marked with the renting activities at fully-furnished rental office providers which facilitate faster relocation and resumption of the business by virtue of the numerous advantages such as initial investment costs and operational costs, etc. Demand by users to the fully-furnished rental offices enabled many centers to reach full occupancy.

Turkey, in general, experienced economic fluctuations in 2021 Q3. Following these economic fluctuations, foreign currencies experienced sharp ups and downs. No significant difference recorded in average rents in Istanbul Office Market, compared to the prior quarter. While landlords in some regions arrange their list prices on Turkish Lira basis, rent discounts were observed in some regions which have been stagnant for a long time. For CBA Class A office buildings, average rent is calculated as USD 15.4/m²/month in 2021 Q2.

With normalization signs in the market, companies now have higher rates of using their office areas physically. Consequently, optimization of office areas became a top item of the agenda. Despite decreasing rate of the office areas, many companies seen to opt in higher buildings when it comes to new building. This fueled the demand to A+ office buildings.

With growing stocks, CBA seen to have buoyant regions in 2021 Q3. Vacancy rates of CBA Class A office buildings retreated compared to prior quarter, resulting at the levels of 29.5%. This regression is mainly driven by the Çalık Plaza, located in Zincirlikuyu-Esentepe-Gayrettepe being rented as a whole by a hospital, and a result eliminated from the stocks.

Office supply was stagnant overall in third quarter of 2021. No change occurred in Class A office stock in this quarter, except the Maslak Square opened in CBA and included in the stock. According to last stock size reached at the end of third quarter of 2021, it is determined that CBA accounts for 33% of the stocks, Non-CBA Europe for 18%, Non-CBA Asia for 23% and Developing Office Regions [Kağıthane, Bomonti - Piyalepaşa, KartalMaltepe, Batı Ataşehir] for 26%.

Despite normalization from pandemic conditions, it is expected that the pandemic will set the tone for how offices will be used in the winter period to come.

6.2. REGIONAL ANALYSIS

6.2.1. BEŞİKTAŞ TOWN

Beşiktaş town is located in European Side of Istanbul city. Town is surrounded by Sarıyer town in the north, Şişli and Kağıthane towns in the west, and Beyoğlu town in the south-east, and Istanbul Strait in the east. Region has no high elevations. However, neighborhoods such as Levent, Etiler, Yıldız are located at high altitude compared with the neighborhoods located along the shore. It has a surface area of 11 km² and a shore length of 8,375.

In the Byzantium period, Beşiktaş was a major settlement center situated by the shores of Bosphorus. Beşiktaş gained its identity of a settlement in the Ottoman Period. This is mainly due to the Ottoman State's complete conquest of the Black Sea. Beşiktaş town was the home

of the Ottoman throne until dissolution of the empire. Previously organized under the Beyoğlu town, Beşiktaş is given the status of town in 1930. When Beşiktaş becomes a city in 1930, it has 14 neighborhoods. In the last 50 years, the number of neighborhood increased to 23 with new settlements. The settlements, except for the historical neighborhoods such as Beşiktaş, Ortaköy, Kuruçeşme, Arnavutköy and Bebek, which forms the core of the Beşiktaş Town, have emerged in the last fifty years. With the estate project launched on the land of historical Levent Ranch in 1950, the foundations of the Levent neighborhood are laid down, followed by Etiler, Konaklar, Akatlar, Nispetiye, Levazım, and Kültür neighborhoods in the last 40 years.

As the Beşiktaş is a central town, it is conveniently accessible. Access to the town center is via public roads and sea ways. There are two stations of Şişhane-Hacıosman Subway, remaining in the Beşiktaş town, as Levent and 4th Levent.

The town hosts the central campuses of the Bosphorus, Yıldız Technical, and Galatasaray Universities, and some main units of the Bahçeşehir, Beykent, Istanbul Technical and Mimar Sinan Universities. Beşiktaş Cultural Center, established by Necati Akpınar and Yılmaz Erdoğan in 1994 has become popular in Turkey in the areas of theater, television, cinema and organizations. In addition, Ortaköy, Mustafa Kemal, Levent and Akatlar Cultural Centers are among important show and performance venues.

Town is an inspiring region of the Istanbul in terms of house construction. Especially, Levent, Etiler, Bebek neighborhoods are examples of modern urbanization. Existing buildings are generally reinforced-concrete and masonry, with sporadic historical wooden masonry buildings. Also, town has skyscraper type business centers. These workplaces are located in the region of Etiler and Levent.

According to 2020 results of Address-Based Census System (ADKNS) prepared by Turkish Statistics Agency (TUIK), total population of Izmir is 176,513.

6.3. SUMMARY OF THE FACTORS AFFECTING THE VALUE OF PROPERTY

Positive Factors:

- Central location,
- Accession convenience,
- Capability of advertising,
- Customer attraction,
- Being located in a region with high rent revenue,
- Contained in a shopping mall,
- High business potential of the vicinity,
- Existence of garage,
- Flat ownership,
- Completed infrastructure of the region.

Negative Factors:

- Substantially adverse effects of the pandemic and resulting restrictions on shopping malls on the turnovers and occupancy rates,
- General decline in the demand towards properties due to the excessive exchange rate fluctuations.

6.4. ANALYSIS OF CURRENT ECONOMIC CONDITIONS, PROPERTY MARKET, CURRENT TRENDS AND UNDERLYING DATA AND THEIR EFFECTS ON PROPERTY VALUES

Although Construction and Property Market was exposed to negative effects of pandemic, being a global risk, it started recovering by the beginning of 2021. Just as other industries, pandemic outbreak also affected the construction and property industries in terms of both business practices and demand. Changing demand composition and disrupted production processes have brought global supply and logistics problems along with it. On top of that, rising raw material costs, along with excessive fluctuations, boosted the cost inflation all over the world. October 2021 Issue "Recovery During A Pandemic

Health Concerns, Supply Disruptions, And Price Pressures" of World Economic Outlook Report of International Monetary Fund (IMF) emphasized that global economic recovery is continuing. According to report, growth projection for Turkish economy in 2021 is revised from 5.8 percent to 9 percent, while growth projections for 2022 remained unchanged at 3.3 percent. Average inflation in Turkey is projected to realize at the levels of 17 percent in 2021, and 15.4 percent in 2022. Long-standing weakness in the commercial properties is seen to continue. This seems to be a result of combined action of changing business sense, effects of outbreak, and relatively excess supply. Turkish construction and house industry will continue to be the one of the driving industries of Turkey. Industry is seen to have much more potential by considering the demographic and economic developments and compared with the world. As of 2021 Q3, the shopping mall supply in Turkey has reached up to 13.7 million m² across 445 shopping malls. With a share of 37%, Istanbul has the highest share in the existing supply. Currently, there is a lettable area of 1.2 million m² under construction stage in 37 shopping malls, while total supply is expected to reach 14.9 million m² in 482 shopping malls by the end of 2024. In terms of the organized retailing density, there is a 164 m² lettable area per 1,000 persons, nation-wide. With 330 m² of retailing density, Istanbul is seen to have a density that is two times the nation-wide density, followed by Ankara which has a retailing density of 303 m².

In line with these information, a vicinity analysis is conducted for the region in which property is located, and it is observed that the rental prices demanded and realized are consistent in themselves, as seen for the properties with similar specifications of subject properties during the market survey. In the region where properties are located, prices are increased by higher rates than inflation rate compared to previous year. Market value appraisal of the subject properties is conducted by considering the specifications provided under the Section "6.3. Factors Influencing Value of Properties".

SECTION 7 APPRAISAL METHODS USED

7.1. VALUATION APPROACHES

Attention must be paid on the fact that valuation approaches must be proper and associated with the contents of the assets being appraised. The three approaches defined and explained below are the basic approaches used in the valuation. All of them are based on the price balance, expected benefits or substitute economy principles. The basic valuation approaches are as follows:

- Market Approach
- Revenue Approach
- Cost Approach

7.1.1. MARKET APPROACH

Market approach refers to the approach where the indicative value of an asset is determined through identical or comparable (similar) assets which price is attainable.

In the following cases, it is found necessary to apply market approach and a significant and/or meaningful weight must be given to this approach:

- The asset being appraised was sold in the recent period at a price that is suitable to the value basis.
- The asset being appraised or assets substantially similar to it are being traded actively in the market,
- There must be frequent and/or currently observable transactions with respect to the substantially similar assets.

Although in the cases given above it is found necessary to apply the market approach and give significant and/or meaningful weight to this approach, market approach can be applied and/or significant and/or meaningful weight can be given this approach in such additional cases as follows where said criteria cannot be met. Where the market approach is applied in the following cases, the appraiser must consider if other approaches will be applied, and weighted in order to support the indicative value as calculated by the market approach:

- The transactions of the asset being appraised or such substantially similar other assets are not sufficiently up-to-date on account of the market fluctuations and dynamism,
- The asset being appraised or assets substantially similar to it are being traded but not actively in the market,
- While information about market transactions are attainable, existence of the substantial and/or meaningful differences between subject asset and comparable assets, therefore potential requirement of the subjective adjustments.
- Unreliability of the information about up-to-date transactions (for instance, uninformed, imperfect knowledge-based, synergic buyer, collusive, compulsory sales transactions, etc.)
- The important factor that affects the value of the asset being the tradeable price in the market, rather than reproduction cost or revenue generation capability.

7.1.2. REVENUE APPROACH

Revenue approach determines the indicative value by discounting the future cash flows into one single current value. In the revenue approach, the value of an asset is calculated by the present value of the revenues, cash flows or cost savings created by the asset. In the following cases, it is found necessary to apply revenue approach and a significant and/or meaningful weight must be given to this approach:

- Revenue generation capability of the asset being very important factor affecting the value from the perspective of the client,
- While there is reasonable estimates available with respect to the amounts and timing of the future revenues, there are few market benchmarks.

Although in the cases given above it is found necessary to apply the revenue approach and give significant and/or meaningful weight to this approach, revenue approach can be applied and/or significant and/or meaningful weight can be given this approach in such additional cases as follows where said criteria cannot be met. Where the revenue approach is applied in the following cases, the appraiser must consider if other approaches will be applied, and weighted in order to support the indicative value as calculated by the revenue approach:

- Revenue generation capability of the asset being only one of the many factors affecting the value from the perspective of the client,
- There are important uncertainties with regard to the amount and timing of the future revenues with respect to the asset being appraised,

- There is a lack of access to the information about subject asset (for instance, a shareholder without a controlling share may access to the past financial statements, but not to the estimates/budgets),
- Subject asset not yet started to generate revenue but planned to do so.

The basis of the revenue statement is the expectation of investors to generate revenue from their investments and requirement that such proceeds should reflect the level of perceived risks on the investment.

In general, investors are only expected to generate additional revenue for systematic risk (known as "market risk" or "risk that cannot be mitigated via diversification").

7.1.3. COST APPROACH

Cost approach is the approach where the indicative value of an asset is determined by applying the principle of "that one buyer will not pay, for a certain asset, an amount that is higher than the ownership cost of another assets which has the equal benefit to it, acquired by either purchasing or building", unless there are factors such as time causing unnecessary burden, impracticality, and risk. In this approach, the indicative value is determined by calculating the current substitution cost or reproduction cost minus all depreciation shares either in the form of physical deterioration or other forms.

In the following cases, it is found necessary to apply cost approach and a significant and/or meaningful weight must be given to this approach:

- Client capable of reproducing an asset having substantially similar benefits with the assets without subject to any legal restrictions, and client capable of reproducing an asset in a short time so that they will not liable to pay an substantial premium to start using the asset as soon as possible,
- Asset being in capable of generating revenue directly, and very nature of the asset making the revenue approach or market approach impossible to apply,
- Basis of the value used is mainly based on the substitution cost, as in the example of substitution value.

Although in the cases given above it is found necessary to apply the cost approach and give significant and/or meaningful weight to this approach, cost approach can be applied and/or significant and/or meaningful weight can be given this approach in such additional cases as follows where said criteria cannot be met. Where the cost approach is applied in the following cases, the appraiser must consider if other approaches will be applied, and weighted in order to support the indicative value as calculated by the cost approach:

- Client planning to reproduce the an asset having the same benefit, but reproduction of the asset is prohibited due to the potential legal impediments and/or requiring a significant period of time.
- Using cost approach as a cross-check for other approaches (for instance, using cost approach as a mean of confirmation if a business, which is valued on the assumption of an ongoing concern, is actually more valuable if valued on the liquidation basis),
- Asset being created so recently that will make assumptions used in the cost approach extremely reliable.

Value of a partially completed asset, in general will reflect the costs incurred until the creation of the asset (and if such costs contributed in the value), and costs required for client to complete the assets and expectations with respect to the value after considering the profit and risk-related adjustments.

7.2. IDENTIFICATION OF THE METHODS TO BE USED IN THE VALUATION

In line with the Communiqué of CMB on "Capital Market Valuation Standards" Series No III-62.1 dated 01.02.2017, and decision of Capital Market Board Decision-Making Body No 25/856 dated 22.06.2017, Article 10.4 "Valuation Approaches and Methods" of International Valuation Standards, 2017 UDS 105, stipulates that "Considering the information and conditions as detailed in the valuation study, where it is specially required to have a high level of reliance upon the accuracy and reliability of one single method, then appraisers do not need to use more than one valuation method for valuation of an asset."

Since different methods are used in the calculations of the land share of an individual unit in our Country, cost approach does not always produce reliable results for these properties (apartment, office, shop, etc.) Also, the cost method will not be employed in the valuation because there is no benchmark lands in the region, and subject properties are individual units contained in a main building.

Among the subject properties, 445 unit individual units contained in the Shopping Block all together form a shopping mall. Since there is no benchmark shopping mall with a size that will provide a benchmark for the shopping mall constituted by the properties as a result of the market research, therefore market approach is not employed in appraisal of the value of the properties as a whole.

As currently being a revenue-generating property, **revenue approach method** will be used in the appraisal of the market value of the 445 individual units constituting the Shopping Block as a whole.

For the appraisal of the value of the 27 apartment-type individual unit contained in the Hotel-A Block, and 1 office-type individual unit contained in the Block E3, **market approach method** will be used as there is sufficient benchmark property for sale to calculate their values.

7.3. CONCLUSIONS VIA MARKET APPROACH METHOD

Market approach method is used in order to appraise the market value of the 27 apartment-type individual unit contained in the Hotel-A Block, and 1 office-type individual unit contained in the Block E3.

7.3.1. EXPLANATIONS ABOUT MARKET APPROACH, AND REASONS BEHIND USING THIS APPROACH IN PROPERTY VALUATION

Article 20.1 of Valuation Approaches and Methods, IVS 105 International Valuation Standards provides for "Market approach refers to the approach where the indicative value of an asset is determined through identical or comparable (similar) assets which price is attainable".

By this method, m² unit value is determined for the property by taking into account the similar properties put on the market and sold in the recent period having adjusted the price according to criteria that may affect the market value.

The benchmarks found out are compared in terms of criteria such as location, construction quality, architectural feature, size, and room for negotiation, and interviews conducted with property marketing companies for a current evaluation of the property market, and also data and information available at our office are made use of for this purpose.

According to sub-paragraph (b) and (c) of Article 20.2 of Valuation Approaches and Methods, IVS 105 International Valuation Standards; "There must be frequent and/or currently observable transactions with respect to the subject asset or substantially similar assets" which allows for adoption of the market approach method.

Market approach method is adopted since there are sufficient benchmarks for sale, and regional prices follow a steady course within themselves as a result of the investigations in the overall region.

7.3.2. INFORMATION ABOUT BENCHMARKS WHICH PRICES FOUND OUT, AND SOURCE OF THESE INFORMATION

Information about the apartments put on sale in the vicinity of the properties are provided below.

- 1) The apartment, contained in the Akmerkez Residence, located at Floor 21, marketed as 550 m² is put on sale for TRY 59,000,000. It has a larger negotiation room.
(m2 unit sales price ~ TRY 107,270) Contact: 0212 282 26 23
- 2) The apartment, contained in the Akmerkez Residence, located at Floor 13, marketed as 240 m² is put on sale for TRY 15,000,000.
(m2 unit sales price ~ TRY 62,500) Contact: 0212 813 15 77
- 3) The apartment, contained in the Akmerkez Residence, located at Floor 11, marketed as 96 m² is put on sale for TRY 8,500,000.
(m2 unit sales price ~ TRY 88,540) Contact: 0212 813 15 77
- 4) The apartment, contained in the Akmerkez Residence, located at Floor 7, marketed as 100 m² is put on sale for TRY 7,500,000.
(m2 unit sales price ~ TRY 75,000) Contact: 0530 782 71 79
- 5) The flat, within Maya Residence, at garden floor, marketed as 320 m² is put on sale for TRY 26,000,000.
(m2 unit sales price ~ TRY 81,250) Contact: 0532 277 00 36

Information about the offices put on sale in the vicinity of the properties are provided below.

- 1) The decorated flat, within Akmerkez Office Block, at floor 10, marketed as 302 m² is put on sale for TRY 16,000,000.
(m2 unit sales price ~ TRY 52,980)
Contact: 0532 430 58 82
- 2) The decorated flat, within Akmerkez Office Block, at floor 2, marketed as 900 m² is put on sale for TRY 44,250,000.
(m2 unit sales price ~ TRY 49,170)
Contact: 0532 369 22 81
- 3) The decorated flat, within Akmerkez Office Block, at floor 1, marketed as 1,000 m² is put on sale for TRY 53,100,000.
(m2 unit sales price ~ TRY 53,100)
Contact: 0533 018 70 19
- 4) The office with decoration, contained in the Zorlu Center, located at Floor 1, marketed as 210 m² is put on sale for TRY 13,750,000.
(m2 unit sales price ~ TRY 65,480)
Contact: 0212 294 50 88
- 5) The office with decoration, contained in the Zorlu Center, located at Floor 4, marketed as 200 m² is put on sale for TRY 13,800,000.
(m2 unit sales price ~ TRY 69,000)
Contact: 0531 704 20 80

7.3.3. MAP SKETCHES OF THE BENCHMARKS DERIVED FROM THE ONLINE MAPS, SHOWING THEIR PROXIMITY TO THE SUBJECT PROPERTY

Please find below the map sketches of the benchmarks derived from the online maps, showing their proximity to the subject residential property.

Please find below the map sketches of the benchmarks derived from the online maps, showing their proximity to the subject office-type property.

7.3.4. DETAILED EXPLANATION ABOUT HOW BENCHMARKS ARE CONSIDERED IN THE VALUATION, AND ADJUSTMENTS RELATIVE TO INFORMATION ABOUT BENCHMARK, AND DETAILED EXPLANATION ABOUT REASONS OF ADJUSTMENTS, AND OTHER ASSUMPTIONS

7.3.4.1. SCREENING OF BENCHMARKS

A research conducted on the residential properties and office-type properties of similar nature to the subject properties, located in the vicinity of them, in order to appraise the market value of the subject properties. As a result of interviews made with the property marketing firms and examinations, no information could be accessed about the data on sales concluded in the recent time, and, therefore, information about properties currently put on sale are collected. Information so collected are compared with other information available in our archive, and as a result, it is observed that benchmark information collected from property marketing companies are consistent with our information available at our archive. The following issues are considered in our benchmark research.

- Benchmarks selected by us share the same market conditions with the subject properties.
- Benchmarks selected by us are located in the same building or in the close vicinity of the subject properties, which location details are provided in the information about benchmark section. If any, goodwill difference of the benchmark located in same or close vicinity are indicated, and considered in the valuation.
- In this report, physical properties of the benchmark properties (for lands: size, topography, zoning rights, and geometric properties, etc.; for individual units and buildings: type of unit, size of usable area, building age, construction quality, technical properties, etc.) are considered, and if different, then their comparison is made as part of benchmark analysis.
- In this report, benchmarks are also selected in terms of full ownership transfer; if different (shared ownership, transfer of right of construction, time-shared property) then it is indicated in the benchmarks and these are also considered in their goodwill.
- If there are special sales terms which affect the value of the benchmark properties (marketing period, above/ below general market average, etc.), they are indicated in the market research section and their impact on the value is analyzed.

7.3.4.2. ANALYSIS OF BENCHMARKS FOR SALES

Benchmark apartments for sales are compared for Hotel-A Block, individual unit No 475 in terms of criteria such as location, architectural feature, construction quality, and size; and accordingly unit market value per m² is calculated. For other individual units, their goodwill is adjusted on the basis of value of Hotel-A Block, Individual Unit No 475 in terms of their location within the building. Details about goodwill adjustment work are provided in the work notes available at our company archive.

For location criteria of the benchmarks, adjustments are made to the values of the properties in terms of their proximity to the subject property, center, main road, transportation axes, and their floors, and location at their floors by considering their locations indicated in the benchmark map sketch provided in Section "7.3.3. Map Sketches Of The Benchmarks Derived From The Online Maps, Showing Their Proximity To The Subject Property" of this report.

For the construction quality of the benchmarks, adjustments are made with respect to the criteria such as building style of the building, need for restoration, number of floors, year of construction, etc.

For the architectural features of the benchmarks, adjustments are made with respect to the criteria such as technical and infrastructure properties of the building.

For the size criteria of the benchmark, adjustments are made with respect to the areas of the benchmarks.

Negotiation Room criteria of the counterparts; an adjustment is made by considering the negotiation room information collected from the property marketing companies.

Benchmarks For Sales are compared in terms of location, construction quality, architectural features, size and room for negotiation, and the unit market value per m is calculated and provided in the following table.

GOODWILL CRITERIA FOR APARTMENT MARKET VALUE (%)							
Benchmarks	M ² Price (TRY)	Location	Construction Quality	Architecture Feature	Size	Negotiation Room	Benchmark Value (TRY)
Benchmark 1	107,270	-30%	0%	0%	10%	-20%	64,360
Benchmark 2	62,500	0%	0%	0%	5%	-10%	59,380
Benchmark 3	88,540	-15%	0%	0%	-10%	-10%	57,550
Benchmark 4	75,000	-5%	0%	0%	-10%	-5%	60,000
Benchmark 5	81,250	-25%	0%	0%	10%	-10%	60,940
Average							60,450

Benchmark offices for sales are compared for individual unit No 583 in terms of criteria such as location, architectural feature, construction quality, and size; and accordingly unit market value per m² is calculated in the following table.

For location criteria of the benchmarks, adjustments are made to the values of the properties in terms of their proximity to the subject property, center, main road, transportation axes, and their floors, and location at their floors by considering their locations indicated in the benchmark map sketch provided in Section "7.3.3. Map Sketches Of The Benchmarks Derived From The Online Maps, Showing Their Proximity To The Subject Property" of this report.

For the construction quality of the benchmarks, adjustments are made with respect to the criteria such as building style of the building, need for restoration, number of floors, year of construction, etc.

For the architectural features of the benchmarks, adjustments are made with respect to the criteria such as technical and infrastructure properties of the building.

For the size criteria of the benchmark, adjustments are made with respect to the areas of the benchmarks.

Negotiation Room criteria of the counterparts; an adjustment is made by considering the negotiation room information collected from the property marketing companies.

Benchmarks For Sales are compared in terms of location, construction quality, architectural features, size and room for negotiation, and the unit market value per m is calculated and provided in the following table.

GOODWILL CRITERIA FOR OFFICE MARKET VALUE (%)							
Benchmarks	M ² Price (TRY)	Location	Construction Quality	Architecture Feature	Size	Negotiation Room	Benchmark Value (TRY)
Benchmark 1	52,980	10%	0%	0%	-10%	-5%	50,330
Benchmark 2	49,170	5%	0%	0%	0%	-5%	49,170
Benchmark 3	53,100	5%	0%	0%	0%	-5%	53,100
Benchmark 4	65,480	10%	-5%	-10%	-10%	-5%	52,380
Benchmark 5	69,000	0%	5%	-10%	-10%	-5%	55,200
Average							52,040

7.3.5. CONCLUSIONS VIA MARKET APPROACH METHOD

Based upon the market data, valuation process and benchmark analysis, the unit market values per m² and market values appraised by taking into account location, construction quality, architectural features and size of the subject properties are provided in the following table.

MARKET VALUES					
ITEM NO	INDIVIDUAL UNIT NO	FLOOR NO	GROSS AREA WITH EXTENSION (M ²)	M ² UNIT MARKET VALUE (TRY)	ROUNDED MARKET VALUE (TRY)
1	475	1	210	60,450	12,695.000
2	476	1	96	63,470	6,093.000
3	477	1	238	60,450	14,387.000
4	478	1	96	63,470	6,093.000
5	479	1	210	60,450	12,695.000
6	480	2	210	67,100	14,091.000
7	481	2	96	69,520	6,674.000
8	482	2	238	67,100	15,970.000
9	483	2	96	69,520	6,674.000
10	484	2	210	67,100	14,091.000
11	485	3	210	67,100	14,091.000
12	487	3	238	67,100	15,970.000
13	489	3	210	67,100	14,091.000
14	490	4	210	67,700	14,217.000
15	492	4	238	67,700	16,113.000
16	494	4	210	67,700	14,217.000
17	495	5	210	74,350	15,614.000
18	499	5	210	74,350	15,614.000
19	504	6	210	74,960	15,742.000
20	509	7	210	75,560	15,868.000
21	513	8	96	69,520	6,674.000
22	514	8	210	75,560	15,868.000
23	518	9	96	70,120	6,732.000
24	519	9	210	75,560	15,868.000
25	523	10	96	70,730	6,790.000
26	524	10	210	76,170	15,996.000
27	537	13	306	76,170	23,308.000
28	583	Garden	900	52,040	46,835.000
TOTAL					399,071.000

As the 513 and 514, 518 and 519, and 523 and 524 are currently combined and used, customer requested us to appraise separate value for each individual unit since they can be marketed by separating them with simple alterations.

7.4. CONCLUSIONS VIA REVENUE APPROACH METHOD

Revenue approach method is employed in the appraisal of the market value of the 445 individual units (Akmerkez Shopping Mall) contained in the Shopping Block among the subject properties.

7.4.1. EXPLANATIONS ABOUT REVENUE APPROACH, AND REASONS BEHIND USING THIS APPROACH IN PROPERTY VALUATION

Revenue approach method supports two basic methods. These methods are direct discounting approach, and return discounting approach.

Direct discounting approach is used to convert the revenue expectation of one single year into a value indicator. This conversion is made in one step by dividing revenue estimate by a suitable revenue rate, or multiplying it with a suitable revenue factor. Direct discounting approach is used when the properties are operated in a balanced way, and there exists abundant number of benchmark sales with similar risk levels, revenues, expenses, physical and locational features and expectation for future.

Return discounting approach is used in order to convert the future interests to the present value indicator by applying a suitable rate of return. This methods requires taking into consideration the potential revenues and expenses within the specified ownership period, in 5 to 10 years. Discounted Cash Flow Analysis (DCF) is the most important example of the revenue discounting. Discounted Cash Flow Analysis is a financial modelling method based upon the definite assumptions with respect to the future revenues and expenses of a property or business. The most common application of DCF analysis is the Internal Rate of Return (IRR) and Net Present Value (NPV).

In this valuation, a study is conducted for calculation of the "Net Present Value". This method assumes that the value of the property will be equal to the sum of the present values of the free cash flows generated by the property in the future years. In revenue discounting approach, net present value of the subject property is calculated for a period of 10 years. Net cash flows generated from the projection are discounted to present values with a discount rate suitable to risk level of the economy, industry and property and accordingly total value of the property is calculated. This total value expresses the (should-be) value of the properties calculated independently of current market conditions.

As currently being an revenue-generating property, **revenue approach method** is used in the appraisal of the market value of the 445 individual units constituting the Shopping Block as a whole.

7.4.2. BENCHMARK DATA USED IN THE ESTIMATION OF CASH INFLOWS AND OUTFLOWS, AND SOURCE OF THESE DATA, AND OTHER ASSUMPTIONS

- 445 individual units contained in the subject Shopping Block have a total gross area of 33,077 m², including outbuildings, for lease.
- Due to the coronavirus pandemic during 2021, subject shopping mall is exposed to the adverse situations such as lockdown, partial lockdown and visitor restrictions etc. as mandated by the governmental measures. Also, management observed to have extended partial rent discounts to protect the integrity of the shops and occupancy rates. Also, it is assumed that revenues will be lower due to the coronavirus pandemic during 2022 as well, and effects of coronavirus pandemic on the economy will be reduced significantly by 2023. Considering all these factors as well as past performance and revenue/expense ratios of the subject shopping mall, rent revenues and percentile revenue and expense distribution estimates are calculated.
- As a result of the examinations on the current monthly market rent revenues generated from properties, as obtained from officers of the landlord company, the total monthly market rent revenue generated from the current tenants of the subject properties are appraised as **TRY 9,864,076**. This value is appraised by considering the performance of the shopping mall in the last 5-month during which all restrictions were lifted.
- For 2021 and 2022, it is projected that other revenues that can be generated from properties, other than rent revenues, may account for about 4.45% of the total rent revenues. This rate is appraised by considering the average performance of the shopping mall in the last 5-month during which all restrictions were lifted.
- For 2023 and later, it is projected that other revenues that can be generated from properties, other than rent revenues, may account for about 4.75% of the total rent revenues. Appraisal of this rate is based on the assumption that economic effects of coronavirus pandemic will significantly decline by 2023, and the average of September and October, 2021, the most productive months of shopping mall during post-pandemic restrictions.

- For 2021 and 2022, overhead costs assumed to be 10.25% of the total revenues with 23.65% for general costs. These rates are appraised by considering the average performance of the shopping mall in the last 5-month during which all restrictions were lifted.
- For 2023 and beyond, overhead costs are assumed to be 8.95% of the total revenues, and 23.05% for general costs. Appraisal of these rates are based on the assumption that economic effects of coronavirus pandemic will significantly decline by 2023, and the average of September and October, 2021, the most productive months of shopping mall during post-pandemic restrictions.
- For 2022, it is projected that monthly rent revenues will increase by 22% also by taking into account the rent discounts. Appraisal of this rate is based on the assumption that negative effects of the coronavirus pandemic will be lower in 2022 compared to 2021, and therefore it is likely that rents will be increased by at least annual inflation rate.
- For 2023, it is projected that monthly rent revenue will increase by 20% by considering rent discounts as well as the assumption that economic effects of coronavirus pandemic will decline significantly by 2023. This rate is projected by considering the past performance of the shopping mall, shifting direction of retailing from brick-and-mortar to the online shopping, potential changes in the habit after pandemic period, and inflation rate remaining relatively same.
- For 2024, it is assumed that monthly rent revenue will increase by 15%, and, for 2025 and beyond, by 10%. These rates are based on the assumptions that inflation rate will gradually decline, pandemic period conditions remaining behind, and performance of shopping mall in the past years.
- The property has a current occupancy rate of ~ 97%. Since the monthly market rent revenue indicated in the table is generated from the currently occupied properties, the vacancy rate is disregarded in the valuation.
- Total value of the properties consists of two components as the value in explicit forecast period where cash flows are forecasted, and the value after this definite forecast period. The constant and steady growth model (Gordon Model) assumes that the cash flows to be generated by property will increase steadily and constantly after the definite forecast period. In the constant and steady growth model, the value is calculated by the equation (cash flow of first year after definite forecast period) / (Weighted average investment cost rate) - (Fixed growth rate of the cash flows after definite forecast period). Real peak growth rate is assumed as 0 (zero), used in the Gordon Growth Model, which gives the value of the cash flows after projection period as of the end of projection period.
- In line with the Communique of CMB on "Capital Market Valuation Standards" Series No III-62.1 dated 01.02.2017, the decision of Capital Market Board Decision-Making Body No 25/856 dated 22.06.2017, and Article 50.6 "Valuation Approaches and Methods" of International Valuation Standards, 2017 UDS 105, stipulates that "...For instance, as a customary practice, cash-flows and discount rates of the property are developed on the basis of pre-tax, while cash flows and discount rates of the businesses are generally developed on the post-tax basis." Since subject properties are immovable properties, this appraisal is done on the pre-tax basis, namely tax is not included in the valuation.

7.4.3. DETAILED EXPLANATION ABOUT HOW DISCOUNTING RATE IS CALCULATED AND REASONS

With the risk factors summation method, as a relative comparison, the discount rate is calculated by summing the basic rate with the certain risk factors such as macroeconomic risks (country risk), specific industry risks and specific property risks. Rate of the return yielded from risk-free securities lies at the heart of the calculation, and then additional premiums are added to this rate to take into considerations the specific investment risks. With risk factors summation approach, discount rate is calculated as follows: Risk-free Rate of Return (Adjusted to country risk) + Risk Premium

Risk-free Rate of Return; as an indicator of the returns from these assets, interest rate of 10-year bond is 24.65% by the report date. High levels of volatility in the interest rates and foreign exchange rates in the recent period cause this rate change constantly. Therefore, risk-free return rate is considered as 22% for the projection period by looking at the last 1 month data.

Risk premium; risk premium added is calculated by considering country, regional, project and management risks. While adding these risks, it is aimed at identifying the liquidification risk, and operation/management risks pertaining to the property. In addition, an adjustment is made for the lower liquidity of said property compared to the financial assets. The scope of this adjustment depends on the period property stayed in the market for sales, and the amount of the profit deprived of during said period. This amount can be measured by comparing the revenues from short-term investments (for example, short-term bonds or certificates of deposit) and the revenues from long-term instruments. Risk premium is taken as 4% by also considering the any kind of risks that may arise during sales of the property projects (managerial, economic and periodical).

After adjusting as per aforementioned factors to include the perceived risks in this context, discount rate is regarded as 26% taken into account in the calculations for 2022 (Risk-free Return Rate (22%) + Risk Premium (4%).

Recent excessive volatility in the foreign exchange rates caused a significant surge in 10-year bond rate. Looking at the recent years, while foreign exchange rates and interest rates followed a stagnant course, 10-year bond rates observed to float at the levels of 13% with a discount rate of around 17% with risk premium. Therefore, discount rate is taken as 20% for 2023, with 17% for 2024 and beyond.

7.4.4. CONCLUSIONS VIA REVENUE APPROACH METHOD

As a result of the analysis conducted with the aforementioned assumptions, the results of which are provided in the Discounted Cash Flow chart enclosed herewith, the present financial value of the total revenues of Akmerkez Shopping Mall consisting of 445 individual units contained in the Shopping Block, is calculated as ~ TRY 1,662,682,000,-.

7.5. THE MOST EFFICIENT AND THE BEST USE VALUE ANALYSIS

The most efficient and the best use is the use of an asset by which the user can yield the highest value. The most efficient and the best use must be a use that is physically possible (feasible), financially profitable, legally allowed and resulting in the highest value. If an optimal use exists, it is possible that the most efficient and the best use of an asset is the current use. However, current use may be distinct from the most efficient and the best use, as well as it can be a proper liquidation case.

Based upon the aforementioned definition, we have the opinion and conclude that the most efficient and the best use of the subject properties will be **"shop, office and apartment"** by considering the locations, sizes, architectural features, construction quality and existing conditions".

SECTION 8 EVALUATION OF ANALYSIS RESULTS AND OPINION

8.1. HARMONIZATION OF ANALYSIS RESULTS WITH DIFFERENT VALUATION METHODS AND DESCRIPTION OF METHODS USED FOR THIS PURPOSE AND REASONS

For the appraisal of the value of the 27 apartment-type individual unit contained in the Hotel-A Block, and 1 office-type individual unit contained in the Block E3, **market approach method** is used as there is sufficient benchmark property for sale to calculate their values. As currently being a revenue-generating property, **revenue approach method** is used in the appraisal of the market value of the 445 individual units constituting the Shopping Block as a whole.

Accordingly, the total market value of the 27 apartment-type individual unit contained in the Hotel-A Block, and 1 office-type individual unit contained in the Block E3 is appraised as **TRY 399,071.000 (Three hundred ninety-nine million seventy-one thousand Turkish Liras)**, and the whole market value of the 445 individual units contained in Shopping Block is appraised as **TRY 1,662,682.000 (One billion six hundred sixty-two million six hundred eighty-two Turkish Liras)**.

Total monthly market rental value of the subject 473 individual units is appraised as **TRY 2,061,753.000 (Two billion sixty-one million seven hundred fifty-three Turkish Lira)**.

8.2. REASONS FOR THE MINIMUM INFORMATION AND FACTS NOT INCLUDED IN THE REPORT

There is no minimum information and facts not included in this report.

8.3. OPINION ABOUT WHETHER LEGAL REQUIREMENTS ARE FULFILLED OR NOT AND WHETHER THE LEGALLY MANDATORY LICENSE AND DOCUMENTS ARE FULL AND COMPLETE.

According to Article 22(1)(b) of the Communiqué on Principles of Real Estate Investment Partnerships, "For any kind of buildings and similar structures to be included in their portfolios, it is mandatory that the relevant building occupation permit has previously been obtained and relevant flat ownership has been established. However, in case structures such as hotel, shopping mall, business center, hospital, commercial warehouse, factory, office building and branches, owned solely or jointly, are fully or partly used only for earning lease revenue, it is deemed to be satisfactory to obtain relevant building occupation permit and that the type indicated in the relevant title deed certificate is appropriate to the current status of the property. Also, for satisfaction of the foregoing condition to obtain building occupation license, it is deemed sufficient to have obtained the building registry documents under the Provisional Article 16 of Zoning Act No 3194 of 3/5/1985."

Necessary licenses and permits have been obtained for the buildings located on the parcel pursuant to applicable legislation, and building registry documents have been issued as part of "zoning peace" pursuant to Provisional Article 16 of Zoning Act No 3194. Details about legal documents are provided in the "4.1.5. Information About Project, License, Diagram Etc. Documents Of Property" section of this report.

8.4. IF ANY, OPINION ABOUT ENCUMBRANCES AND MORTGAGES ESTABLISHED ON THE PROPERTY

Management plan, lease annotation and outbuildings as indicated in the title deed records are not of restrictive nature and have no adverse impact on transfer and value of the property under the provisions of (c) and (j) of 22(1) of Communiqué on Principles of Real Estate Investment Partnerships.

8.5. INFORMATION ABOUT AS TO WHETHER SUBJECT PROPERTY IS SUBJECT TO ANY RESTRICTIONS FOR TRANSFER, EXCEPT FOR ANY MORTGAGE, AND ANY ENCUMBRANCE WHICH MAY DIRECTLY AND SUBSTANTIALLY AFFECT THE VALUE OF THE PROPERTY

We have the opinion and conclude that there is no obstacles which prevents from transferring the subject property under the provisions of capital market legislation upon the examination of the title deed records of the subject property.

8.6. IF VALUATION IS ABOUT A LAND OR PLOT, THEN INFORMATION ABOUT AS TO WHETHER ANY ACTIONS INITIATED FOR PROJECT DEVELOPMENT ON IT WITHIN FIVE YEARS AFTER ACQUISITION DATE

Subject properties are not land or plot.

8.7. IF VALUATION IS ABOUT CONSTRUCTION RIGHT OR TIME-SHARED PROPERTY RIGHT, THEN INFORMATION IF THERE IS ANY RESTRICTIONS WITH RESPECT TO THE TRANSFER OF SAID RIGHTS EXCEPT FOR THOSE ARISING OUT OF AGREEMENTS FOR THIS PURPOSE

Subject properties are excluded from the specified scope.

8.8. OPINION ABOUT IF THE FUNCTION OF PROPERTY REGISTERED IN TITLE DEED RECORDS, ITS ACTUAL USE, AND INCLUSION IN PORTFOLIO MATCH, AND OPINION ABOUT ANY RESERVATIONS AGAINST INCLUSION IN THE PORTFOLIO

Article 22(r) of the Communiqué on Principles concerning of Real Estate Investment Trusts of Capital Market Board stipulates that "Title deed type, actual use and type for including the portfolio, of the properties to be included in the Trust portfolio must be in accord with each other. In case of existence of non-performing, or abandoned, risk as indicated in the statements section of the title registry, buildings on the lands and plots owned by Partnership, if said conditions are verified by a property valuation report, and if necessary, and a statement is submitted to Board that said buildings will be demolished and necessary changes will be made in the function of the properties as registered in the title deed office, then the condition defined in the first sentence shall not apply.

Actual use of the properties conform to the function of properties as indicated in the title deed records. We have the opinion and conclude that there is no risk against inclusion of the properties in the "buildings" title of a portfolio of Real Estate Investment Partnership as well as lease and transfer (sales) of the properties under the provisions of capital market legislation.

SECTION 9 CONCLUSION

9.1. CONCLUDING SENTENCE OF THE APPRAISAL OFFICER-IN-CHARGE

We have the opinion and conclude that there is no risk against inclusion of the properties in the "buildings" title of a portfolio of Real Estate Investment Partnership as well as transfer (sales) and lease of the properties under the provisions of capital market legislation.

9.2. FINAL VALUE APPRAISAL

Total market value appraised for the properties described in the report upon on-site examination of the properties, by considering their locations, sizes, architectural features, construction qualities, use functions, and market research in the vicinity under the current economic conditions are provided in the following table.

	EXCL. VAT	INCL. VAT
TOTAL MARKET VALUE OF 473 INDIVIDUAL UNITS	TRY 2,061,753.000	TRY 2,432,868.540

- VAT rates are according to the current applicable legislation. Exemptions related with Value Added Tax, exceptions and provisions specific to tax rates of Tax Laws are not taken into account. VAT rate is taken as 18%.
- This report cannot be used by any person or entity other than client entity and under no circumstances, this report can be submitted to 3rd parties other than client entity. Our company disclaims any responsibility that may arise out of use of the copies.

Respectfully submitted for your information. 31 December 2021
