

AKMERKEZ GYO ENVIROMENTAL POLICY

As Akmerkez, we host many “firsts” with carefully considered details for our visitors and guests. We place importance on sustainability, shape our activities with the aim of being one of these “firsts” and act with a people-centered approach. As an organization aware of its responsibilities towards the environment and society, our goal is to leave a livable and clean environment for future generations. In line with the Environmental Policy we have developed within this scope, we are committed to:

- Using resources efficiently,
- Preventing pollution at its source,
- Conducting our activities in a way that minimizes our negative environmental impacts, researching ways to reduce and reassess our waste, and legally disposing of it when reduction is not possible,
- Complying with applicable environmental laws and regulations,
- Ensuring continuous improvement of the environmental management system to enhance environmental performance,
- Taking precautions against emergencies in areas with process risks, and being prepared for extraordinary situations by continuously updating these precautions,
- Raising environmental awareness among our employees,
- Ensuring that all our employees play a role in effectively implementing the Environmental Policy, with the responsibility resting with the Sustainability Committee,
- Reviewing the policy and management system at least once a year, making necessary improvements and updates as needed.
- Enforcing this policy with the approval of the Board of Directors.
